About the Session:

The Housing Equality Center of Pennsylvania will deliver an in-person training designed to teach housing locators, social workers, case managers, and advocates how to apply state and federal fair housing laws, when appropriate, to help clients navigate a successful rental experience.

The session will provide an overview of Pennsylvania Landlord-Tenant Law and Fair Housing Law. Participants will also learn specific fair housing strategies for addressing various landlord-tenant disputes, with the goal of maximizing the likelihood of a successful rental experience and preventing eviction. Special emphasis will be placed on supporting tenants with behavioral health challenges.
